Developing Future Leaders for the Equine Industry

“Developing Future Leaders” is a two-day short course geared toward those involved in New Jersey’s equine industry. Developed and offered by the Rutgers Equine Science Center, the course brings together a team of instructors led by Dr. Karyn Malinowski, director of the Equine Science Center and Mary Nikola, Ed.D., director of leadership and organizational development at the New Jersey Agricultural Experiment Station. Topics will include the value of the equine industry, networking, relationship building, decision-making strategies, leadership practices and behaviors, building coalitions, and industry management.

Dr. Nikola, who teaches a two-year leadership development program through the New Jersey Agricultural Society, believes that the course will be especially invaluable to those committed to the future success of the equine industry in New Jersey. “This course is unique in that it is focused entirely on equine interests and opportunities,” says Dr. Nikola. “In addition, it brings Karyn Malinowski to the classroom – and students are sure to be moved by the passion she brings for the horse industry to her teaching.” A high school diploma is required for enrollment. Adult learners will be able to register for the class through the Office of Continuing Professional Education.

Registration Information

January 10 & 12, 2012

Fee - \$150.00

Time: 8:30 am - 4:30 pm

Location: Showplace Farms
